

### Author contributions

T.A.K. conceptualized the project, developed the methodology. Z.A. conducted formal analysis, and drafted the original writing. M.H. and H.S. contributed to the methodology, conducted investigations, provided resources, visualized the data. F.A. contributed to the reviewing and editing of the writing.

### Acknowledgment

Athur thanks to the Department of Agricultural Engineering, University of Engineering and Technology Peshawar, Pakistan.

### Competing financial interests

The authors have no conflict of interest.
